

Bulletin of Advanced Course of Akashi National College of Technology

NO.11 (March)

CONTENTS

Minimum Starting Voltage Reduction of the HID Lamp for Headlights of a Car, and the Elucidation of an Electric Discharge CourseShinichiro ICHIKI	(1)
Speech Synthesis of Japanese Vowels by Spectrum Formation FunctionsChizu INAGAWA	(7)
Examination Concerning the Decrease of the Minimum Starting Voltage of the HID Lamp of Headlight of a CarShohei KATAYAMA	(13)
Research on Aerodynamic Performance Improvement of Micro Air Vehicle WingsYutaka KAMATANI	(19)
Self-Localization for Mobile Robots Using Laser Mouse SensorsRei KAWASAKI	(25)
Ultrasonic Velocity Changes Due to Annealing in Plastic Deformed Rolled CopperShusaku SAITA	(31)
Intuitive Remote Control for Mobile Manipulators Based on Hand GestureAtsushi SAKAI	(37)
Binarizing method for detecting white lines in color images using Hough transformAtsushi SHIOMITSU	(43)
A proposal of topics ranking method based on link structure for personal news websitesMasato SUEYASU	(49)
Building and Predicting of Performance of a Small Unmanned AirvehicleTomo SUZUKI	(55)
An Experimental Study on the Turbulent Wake of a Cylinder with Oscillating Fins Placed above a Flat PlateToshiki TAKAKURA	(61)
Structure Control of Alloy by Using SupercoolingSatoshi NAGAO	(67)
The Temperature Dependency of Ultrasonic Velocity in Epoxy ResinTakuto MATSUOKA	(73)
Frictional Characteristic of Solid Lubrication Film Formed by Laser CladdingYuta MATSUGAMI	(79)

Development of Operating System for Multi-Connected Crawler VehicleRyogo YOSHIMURA	(85)
Traffic Planning for Small Cities in Suburban Sections of Metropolitan AreasHiroki ONISHI	(91)
Strength Improvement of Muddy Soil Mixed with Steel SlagToshimitsu KAKUDA	(97)
The Effect of Dynamic Properties of Aggregate and Chemical Admixture in Fresh ConcreteAi IOZUMI	(103)
Evaluation of Recycled Fine Aggregate Produced by Wet Process from Concrete WasteSho TAKEUCHI	(109)
Strength of Straw Fiber-Reinforced MortarYuki NAKAMOTO	(115)
Proposal of Architecture That Leads to the Redevelopment of MidosujiYoshiro OGAWA	(121)
Study on the Conservation System Considering Earthquake Resistant of Traditional Timber Structures -Japanese Traditional Rural and City Houses-Keigo NISHIMURA	(127)
Experimental Study on Factors Affecting the Size of Tsunami Generated by Submarine Landslides Using Triangular and Circular Shaped Cross Sections Model	••Takayuki HASHIMOTO	(133)
Research and Proposal on Museum Design:Kobe International Food MuseumKeisuke HAYATA	(139)
Tourism Universal Design and Akashi Station Area -Case study on visually impaired people-Junichiro MINAMI	(145)
